

TRANSFERRED TECHNOLOGY of POSTURAL STABILITY ASSESSMENT to M/s OCEANIC FITNESS CHANDIGARH

September 12, 2017:

The Postural Stability Assessment System was developed under the Fast Track Translational program of CSIR, which emphasizes on transfer of research output for the benefit of common people of the society. The system developed by CSIR-CSIO provides the bio-feedback along with audio and vibrational feedback to the user for correcting the postural stability. The technology has been transferred to M/s Oceanic Fitness Chandigarh by Prof. RK Sinha Director CSIR-CSIO.

Mr. Inderpal Singh Director of M/s Oceanic Fitness in Joint venture with Mr. Mukhwinder Singh of Accelor Microsystems will now start a new vertical for manufacturing of rehabilitation devices with this technology from CSIR-CSIO, which will besides benefiting the society in general will also help those requiring rehabilitation in the Armed Forces.
